Jump Kids Jump Movement®

Indiana kids are among the most overweight in the nation. Children and youth who are obese are at risk of heart disease, Type 2 Diabetes, Asthma, Sleep Apnea, and Social Discrimination. Indiana Kiwanians have helped encourage Indiana’s kids to become more active since the launch the Jump Kids Jump Movement®. Resources are available to start and support a jump rope team for kids in your community — anywhere — schools, churches, community centers, your neighborhood and keep kids jumping! To learn more visit: www.rileysafetystore.org. Click on Community Outreach Programs then click on www.jumpkidsjump.org

What is KIDS for Riley?

KIDS (Kiwanis In Direct Support) for Riley is an exciting program to benefit the families of Riley Hospital for Children, Indiana’s only comprehensive children’s hospital. Coordinated by Hoosier Kiwanians, this initiative helps meet the needs of Riley families through hands-on support and service projects that benefit children at the hospital and throughout communities statewide.

Since 2000, KIDS for Riley has served as the foundation for many special projects, partnerships, and new possibilities to improve the quality of life for children and families in Indiana and nationwide.

Kiwanians and hospital partners work side-by-side to offer children and families much needed support, education, and resources through innovative service projects that address child safety, health and support.

Let us tell you about what KIDS for Riley is doing to make a difference in the lives of children, and how you can become a part of it.

REACH OUT INDIANA

Families of children being treated at Riley Hospital often arrive in a rush with little time to think of their needs back home. Reach Out Indiana is an ideal way for Kiwanians to join together and create an extra level of support for families. Volunteer as a local Reach Out Indiana Ambassador to help Riley Hospital in your community by offering the following services.

- transportation
- child care for siblings
- home maintenance (cutting grass, picking up mail, raking leaves)
- fixing or delivering meals
- additional family needs

Sign up as a community leader, or volunteer when help is needed.

Child Injury Prevention

The leading cause of death for Hoosier kids and kids nationwide ages 1-14 is injuries. Prevention education given at the local levels makes a big difference in preventing many children from ever having to come to Riley Hospital. Your club can partner with police and fire agencies, emergency medical services, and other community leaders to teach children about:

- bike safety
- water safety
- home safety
- fire safety

Riley Hospital’s Community Education and Child Advocacy Department can provide you with free resources that are easy and fun to use.

Adapted Bike Safety Program

Many children with special needs cannot ride a typical two wheeled bicycle. Riley Hospital for Children and Hoosier Kiwanians identify children in need, and provide specially designed adaptive bikes. Your club can help by:

- raising money
- hosting a safety bike course
